

Clausing Radial Drills

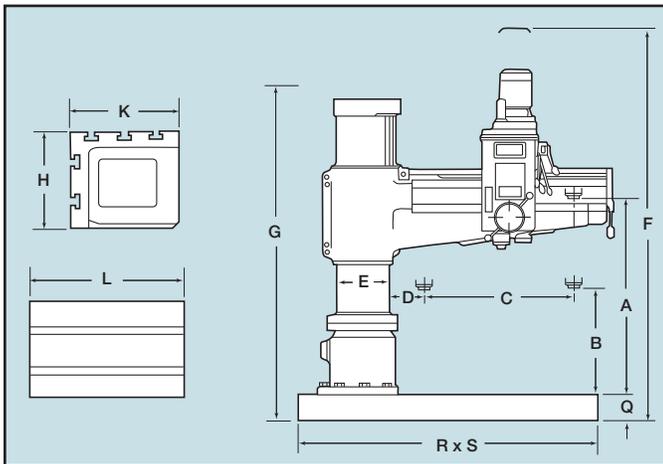

Model: CL1600H

Features and Standard Equipment:

- Equipped with hydraulic separate clamping unit. Vertical movement of arm is coordinated by an IC timer. With a single touch on push button switch, you can have the arm unclamped then move vertically, or stop then clamp automatically. Very easy to operate, and tools will always stay at the same point after tool shifting.
- Gears in gear box are cooled by oil cycled by an oil pump to minimize gear wear.
- Friction type disc clutch absorbs impact force caused by vertical movement of spindle, and protects all transmission units inside gear box. With quick spindle return, the clutch will help speed-up the tapping operation.
- Special automatic tool eject device is supplied to allow you to change tools quickly. (No drifter is required) Special arm elevating device is provided to prevent arm from falling down abruptly after years of usage.
- Coolant system
- CSA Electrics Standard ● Tool kit and manuals
