MILD STEEL

APPROXIMATE SPEED: 50 FPM

DIMENSIONS: 57" L X 26" W X 34" H

APPROXIMATE WEIGHT: 600 LBS.

No other manufacturer offers this machine. There is no "S" cleat down the middle. Instead, drive gears down the middle power outboard shafts on both sides. On the outboard shafts we developed a square drive, eliminating the key and keyway on the roller. Roll sets now available are "6 in 1 Tap-in", "Right Angle", "Drive Cleat", "ACME Double Seam", and "Male and Female Button Lock". The RAMS square drive shafts enable quick change of rolls - swap a full set of rolls in less than 3 minutes. No tooling or keys to worry about. Just push a button to release the rolls. Convert from a Button lock to an ACME/Drive Cleat machine or whatever combination you desire in just minutes. No adjustments necessary.

PLEASE NOTE: YOU MUST HAVE A 20 AMP BREAKER TO OPERATE THIS MACHINE SAFELY.
